

Math3346 – Location of Computer Laboratory (Tues 2-4)

The most immediate way to find the lab is to

- (i) go to the car park that lies between Coombs & the chancelry.
- (ii) Face the Coombs (honeycomb) building, and you should be able to see the breezeway.
- (iii) Enter the breezeway (i.e., opening in the wall). On the left is a door that has a sign directing giving directions to the computer lab.
- (iv) Enter the door, and keep going along the corridor till you can go no further. At that point the door to the lab will be immediately in front.

See also the directions for finding the lab, and a map, that can be found at:

<http://rspas.anu.edu.au/intranet/trgmap.htm>

The black arrowed line shows the route along the corridor from the breezeway.

Alternative routes, from the main entrance of Coombs, are either:

- (1): Facing away from the main entrance, turn right (i.e., go clockwise) and go around the outside of the building, past three sides of the hexagon that starts by the entrance. You should then have reached the breezeway. Turn into it, and the door that has the sign giving directions to the lab should be on your left.
- or (2): Enter the courtyard inside the hexagon, and cut directly across to the breezeway on your left
